Career Objective:

I'm seeking for a demanding job in the field of computer science that will allow me to demonstrate my both theoretical and practical competence, improve my experimental and research skills, and progress into more senior employment in the technical fields that interest me.

Education:
B.Tech IT (3rd Year Running)   *(2021-2025)*
Institute: U.V.Patel College of Engineering ,Ganpat University

Internships:

Group Projects:

- **Project Name: Living link (Society Management System):**
  The "Living Link" project is all about making life better in communities where people live together. These places, called cooperative housing societies, often have problems like not being able to talk to each other easily, worries about safety, and things being a bit disorganized because they use old-fashioned ways of doing things. In implementation I used HTML, Css and JavaScript as frontend languages and Node.js and JavaScript in backend.

Skills and Expertise:

- **Technical Skills:** Python, C, C#, HTML, CSS, JavaScript, Data Structures, SQL, Node.js, React.js ,PHP.
- **Organizational Skills:** Public Speaking, Event Management, Leadership, Teamwork.
- **Languages Known:** English, Hindi, Gujarati.

Extra-Curricular Activities:

- Got a first place in a running race competition held at the school level.
